ANDRÉS ALEJANDRO CHÁVEZ VÁZQUEZ

Software Developer | Backend & Enterprise Applications

(+52) 8111027436 • andreschavezv2003@gmail.com • Santa Catarina, N.L., Mexico

PROFESSIONAL SUMMARY

Software Technology Engineer (Graduated 2026) with over 2 years of corporate experience building backend services, enterprise applications, and automating critical business workflows. Proven track record across the full software development lifecycle: gathering stakeholder requirements, functional design, system integration, and production delivery. Focused on practical applications of LLMs, AI agents, and enterprise process optimization.

TECHNICAL SKILLS

Advanced Level: Python, R, SQL, Applied LLMs & AI Agents, Power Platform (Power Apps, Power Automate), HTML, CSS, Microsoft Excel.

Intermediate Level: C#, Java, JavaScript, Git, MongoDB, Express.js, React, Node.js.

Basic Level: Flutter.

PROFESSIONAL EXPERIENCE

Grupo Financiero Banorte — 2023 – Present

Procurement Analyst (Focused on Applications & Process Automation)

- Engineered 3 internal production applications for Procurement, sustaining daily adoption by 4–5 operational users, built with Power Platform integrated with relational SQL Server databases.
- Automated 6 end-to-end business workflows, removing repetitive manual operations via Power Automate and custom REST API integrations with corporate platforms (SAP Ariba, Doc2Sign).
- Resolved an average of ~120 technical support tickets monthly (~4 daily), addressing operational client requirements with structured resolution documentation and direct stakeholder communication.
- Led full software development lifecycles: requirements gathering, functional architecture, continuous implementation, and production rollout aligned with business milestones.

School of Mechanical and Electrical Engineering (FIME – UANL) — 2022 – 2026

Software Technology Intern – Development & Academic Research

- Built software solutions for student academic persistence analysis; succeeded in having 3 tools formally integrated into the active curriculum across 3 accredited courses.
- Developed automated data analytics scripts in Python and R, standardizing student performance tracking reports for the academic administration.
- Provided technical logistics and custom software support for 3 major institutional academic events, coordinating with multidisciplinary teams and developing custom feature modules.

EDUCATION

B.S. in Software Technology Engineering — 2022 – 2026

School of Mechanical and Electrical Engineering – UANL, Monterrey, Mexico

Graduated Jan–Jun 2026 • Professional License in progress

General High School Diploma — 2018 – 2020

High School No. 23 – UANL, Santa Catarina, Mexico

Academic Merit Award • 2nd Place Class of 2019

LANGUAGES

Spanish: Native.
Technical English: Professional fluency in documentation, API specifications, system architecture reviews, and reporting.

CORE COMPETENCIES

Stakeholder Communication • SDLC Management • Technical Adaptability • Analytical Problem Solving & Proactivity.
